## **EXAMINER'S AMENDMENT**

### ***Election/Restrictions***

1. Newly submitted claims 36-39 are directed to an invention that is independent or distinct from the invention originally claimed for the following reasons: Claims 36-39 are directed to a different invention such as suspending the tubular string in a wellbore and in addition these claims would require a different search due to the divergent claimed subject matter.

Since applicant has received an action on the merits for the originally presented invention, this invention has been constructively elected by original presentation for prosecution on the merits. Accordingly, claims 36-39 are withdrawn from consideration as being directed to a non-elected invention. See 37 CFR 1.142(b) and MPEP § 821.03.

2. The terminal disclaimer filed on 11/21/05 disclaiming the terminal portion of any patent granted on this application which would extend beyond the expiration date of U.S. 6,591,471 B1 has been reviewed and is accepted. The terminal disclaimer has been recorded.

3. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Walter Grollitsch on December 6, 2005.

The application has been amended as follows:

In the title,

"Method and Apparatus for Aligning Tubulars" has been changed to  
- -Method for Aligning Tubulars- -.

In the claims,

Non-elected **claims 36-39** have been canceled.
